

## Steven Rudy Hybrid Cloud Broker

Steven Rudy serves as a Hybrid Cloud Broker for the Defense Information Systems Agency (DISA), where he has been for the past four years. In this role, he acts as a primary facilitator for delivering integrated and functionally relevant cloud and compute capabilities to the warfighter. Mr. Rudy is responsible for bridging the gap between mission partner requirements and DISA's comprehensive service portfolio, ensuring all solutions directly support the strategic imperatives of Readiness, Continuous Modernization, and Lethality.

Mr. Rudy brings a decade of experience with DISA to his role, having previously spent six years as a J9 Project Lead. In that capacity, he successfully led a wide range of complex IT project efforts for numerous Department of War (DoW) mission partners, overseeing key initiatives in both CONUS and OCONUS environments to deliver critical capabilities across the globe.

This extensive civilian experience is complemented by his ongoing service as a Major in the Pennsylvania Air National Guard. He currently serves with the 193rd Air Operations Group as a Cyberspace Operations Officer. This military background provides him with deep, firsthand expertise in strategic and tactical operations, allowing him to better anticipate strategic partner needs and deliver solutions that are truly effective at the tactical edge.

Leveraging his unique blend of hands-on project leadership, strategic military experience, and a deep understanding of the mission partner landscape, Mr. Rudy is exceptionally positioned to drive cloud adoption and deliver superior capabilities across the Department of Defense.
