

Michael (“Mike”) Canna
Vice President, Technology & Engineering Growth
SOSi

Michael Canna serves as Vice President of Growth for SOSi’s Technology and Engineering business unit. As a former Defense Intelligence Senior Executive Service (DISES) civilian, Mike served as the Chief Information Officer (CIO) for the Army Intelligence and Security Command (INSCOM).

During his tenure at INSCOM, he was tasked with establishing the Ground Intelligence Support Activity (GISA), which provided centralized network and infrastructure management of global military intelligence (MI) communications. Based on strategic direction from the Army Cyber Command (ARCYBER) Commanding General and the Department of the Army G2, Mike planned and executed the global consolidation of existing MI IT organizations to form the backbone of today’s GISA. His plan also established and resourced critical nodes in Wiesbaden, Germany; Fort Bragg, North Carolina; and Shafter Flats, Hawaii, with supported detachments at Fort Gordon, Georgia; Camp Humphries, ROK; and Camp Zama, Japan.
