

# A Credible Partner for a Mission-Critical Task

## Kamiwaza AI

A US-owned and operated company founded to solve data gravity for the world's most complex organizations.

## Production-Proven

Our technology is commercially available and has been delivered to government clients, including the DHS and the IC.

## Cleared & Ready

We have a team of 35 professionals with deep expertise, including TS/SCI-cleared personnel ready to deploy and support operations in classified environments.

## Partner Alliances

+ 25 SI, ISV and VAR partners across Federal and Commercial domains

Acquisition diversity for accelerated time to outcome

## Luke Norris, CEO

Luke Norris, CEO and Co-Founder, is powering Kamiwaza's vision to industrialize AI for the 5th Industrial Revolution. Before launching Kamiwaza in 2023, Luke founded Faction Inc., led pioneering multi-cloud tech, and drove over \$100M in venture investment. With more than a dozen patents and deep experience guiding Fortune 500s and government agencies on global AI deployments. Featured at Intel Vision 2025, his work showcases how enterprises unlock massive, secure AI value at scale.

## Matt Wallace, CTO

As CTO, Matt is responsible for product development, managed and professional services, and architecting Kamiwaza's AI offering. Prior to Kamiwaza, Matt worked 25 years in technology roles at both startups and Fortune 500 companies, including leadership roles at Faction, Level 3 Communications, ViaWest, and Exodus Communications, among others. Matt is the co-author of "Securing the Virtual Environment: How to Defend the Enterprise Against Attack", one of the first books to holistically address cloud security concerns. Matt is an official member of the Forbes Technology Council.

## OEM/ISV Ecosystem

+12 Hardware, Silicon and Cloud partners validated

Deployment flexibility for any mission constraint
