

**Vincent Hoang**  
**Chief Information Security Officer (CISO)**  
**Office of Enterprise Technology Services**  
**State of Hawaii**

The Office of Enterprise Technology Services' Cyber Security Program is led by State CISO, Vincent Hoang, who is responsible for securing state government information resources and infrastructure. He brings 25 years' experience in developing and implementing effective information technology strategies, including the application of cybersecurity, network management and systems design to improve business outcomes. Vincent most recently served as the enterprise architect for Hawaiian Telcom, where he secured infrastructure for customers and conducted network architecture, performance, security risk and systems infrastructure assessments. He also worked as a senior systems consultant for Bank of Hawaii and a security engineer for Munger, Tolles and Olson in Los Angeles.
