Justin Wilkins
Director of Systems Engineering
US Public Sector
Varonis

Justin Wilkins is currently the Director of Systems Engineering at Varonis US Public Sector, where he helps organizations secure and govern their unstructured data. He has over seven years of experience in data security and governance across multiple platforms in both the federal and commercial space. Prior to joining Varonis, he held engineering roles at Philips Healthcare, GE Aviation, and Bloomberg LP. His background as an aerospace engineer provides him with a deep understanding of the technical challenges with data security and the ability to develop creative solutions to solve complex problems. He earned a B.S.E. in Mechanical & Aerospace Engineering from Case Western Reserve University and currently resides in Washington, D.C. He enjoys studying foreign languages, traveling, spending time with family, surfing and playing soccer.
